Topic 1: Course Overview > 1.2 Internet Hierarchy > 1.2 Quiz

1.2 QUIZ QUESTION 1 (1/1 point)

What does the acronym ISP stand for?

Internet Service Provider

Answer: Internet Service Provider

EXPLANATION

Acronym ISP stand for Internet Service Provider

1.2 QUIZ QUESTION 2 (1/1 point)

Which of the following is/are true?

The Internet is a network of networks.

A Tier 2 ISP connects exclusively to a single Tier 1 ISP above it and possibly to multiple Tier 3 ISPs below it, but is not allowed to connect laterally to other Tier 2 ISPs.

Typically, hosts forward data, while routers run applications.

ISPs at lower levels of the hierarchy typically provide connectivity over smaller geographical regions.

Note: Make sure you select all of the correct options—there may be more than one!

EXPLANATION

The Internet is only a rough hierarchy, so Tier 2 ISPs may connect with each other, and to multiple Tier 1 ISPs. Routers do forwarding, while hosts run applications.
